Policy

It is the policy of the Washington Medical Commission (Commission) to consider the attached Clinical Experience Assessment (CEA) as the clinical assessment adopted by the Commission to determine the readiness of international medical graduates to apply and serve in residency programs according to RCW 18.71.472.

Introduction

In 2020, Senate Bill 6551; required that the Washington Medical Commission (Commission) "adopt a clinical assessment to determine the readiness of international medical graduates to apply and serve in residency programs and adopt a grant award process for distributing funds" pursuant to appropriation by the legislature and donations received from public and private entities. The Workgroup voted to propose the following Clinical Experience Assessment (CEA) form, Attachment A, which meets the requirement set forth by the legislature.

Instructions

Purpose of the CEA Form. The CEA is intended for physician assessors working with IMGs to prepare them for residency and to determine their overall readiness for residency training. The CEA is not an element of application for residency nor is it a qualification for residency.

Assessment of Residency Preparedness. The CEA is to be used to assess what level of "entrustment" seems appropriate for the IMG to enter a residency and to aid the IMG in successfully gaining a residency position.

Frequency of Assessment. The CEA is to be used as a quarterly assessment tool throughout the program until a passing score on all competencies has been attained, signifying residency readiness.

Monitoring of the CEA Form's Effectiveness. As funding and staffing capabilities permit, the Workgroup should develop a monitoring system to track effectiveness and limitations involving the use of the CEA. Once developed, the Workgroup is to begin tracking progress and challenges of IMGs who utilized the CEA form, identify where additional education or targeted trainings may be needed, and adjust to optimize the effectiveness of IMG pre-residency training, and of the CEA form itself.

Retention. The CEA form should be retained for four years and be made available upon request.

Clinical Experience Assessment

	Ranking Guidelines					
1	"I did it."	The licensee required complete guidance or was unprepared or not competent; I had to do most of the work myself.				
2	"I talked them through it."	The licensee was able to perform some tasks competently but required repeated directions.				
3	"I directed them from time to time."	The licensee demonstrated some independence and competence and only required intermittent prompting.				
4	"I was available just in case."	The licensee functioned fairly independently and competently and only needed assistance with nuances or complex situations.				
5	"Not observed."	The licensee was not seen or observed completing this task.				

1. G	1. Gather a History and Perform a Physical Examination					
1	2	3	4	5	Task	
					Obtain a complete and accurate history in an organized fashion.	
					Demonstrate patient-centered interview skills.	
					Demonstrate clinical reasoning in gathering focused information relevant to a patient's care.	
					Perform a clinically relevant, appropriately thorough physical exam pertinent to the setting and purpose of the patient visit.	
2. Pr	rioritiz	ze a D	oiffere	ntial	Diagnosis Following a Clinical Encounter	
1	2	3	4	5	Task	
					Synthesize essential information from previous records, history, physical exam, and initial diagnostic evaluations to propose a scientifically supported differential diagnosis.	

1	2	3	4	5	Task
					Prioritize and continue to integrate information as it emerges to update differential diagnosis, while managing ambiguity.
					Engage and communicate with team members for endorsement and verification of the working diagnosis that will inform management plans.
3. Re	ecom	menc	and	Interp	pret Common Diagnostic and Screening Tests
1	2	3	4	5	Task
					Recommend first-line cost-effective screening and diagnostic tests for routine health maintenance and common disorders.
					Interpret results of basic studies and understand the implication and urgency of the results.
4. Er	nter a	nd Di	scuss	s Orde	ers and Prescriptions
1	2	3	4	5	Task
					Compose orders efficiently and effectively verbally, on paper, and electronically.
					Demonstrate an understanding of the patient's condition that underpins the provided orders.
					Recognize and avoid errors by attending to patient-specific factors, using resources, and appropriately responding to safety alerts.
					Discuss planned orders and prescriptions with team, patients, and families.
5. D	ocum	ent a	Clini	cal Er	ncounter in the Patient Record
1	2	3	4	5	Task
					Prioritize and synthesize information into a cogent narrative for a variety of clinical encounters (admission, progress, pre- and post-op, and procedure notes; informed consent; discharge summary).
					Follow documentation requirements to meet regulations and professional expectations.

					Document a problem list, differential diagnosis, and plan supported through clinical reasoning that reflects patient's preferences.
6. Pr	ovide	e an C	ral Pr	resent	tation of a Clinical Encounter
1	2	3	4	5	Task
					Present personally gathered and verified information, acknowledging areas of uncertainty
					Provide an accurate, concise, well-organized oral presentation.
					Adjust the oral presentation to meet the needs of the receiver.
					Demonstrate respect for patient's privacy and autonomy.
			al Que 3 requ		s and Retrieve Evidence to Advance Patient Care
1	2	3	4	5	Task
					Combine curiosity, objectivity, and scientific reasoning to develop a well-formed, focused, pertinent clinical question (ASK).
					Demonstrate awareness and skill in using information technology to access accurate and reliable medical information (ACQUIRE).
					*Demonstrate skill in appraising sources, content, and applicability of evidence (APPRAISE).
					*Apply findings to individuals and/or patient panels; communicate findings to the patient and team, reflecting on process and outcomes (ADVISE).
8. G	ive or	Rece	ive a	Patie	nt Handover to Transition Care Responsibility
1	2	3	4	5	Task
					Document and update an electronic handover tool and apply this to deliver a structured verbal handover, using communication strategies known to minimize threats to transition of care
					Provide succinct verbal communication conveying illness severity, situational awareness, action planning, and contingency planning.
					Demonstrate respect for patient's privacy and confidentiality.

9. C	ollabo	orate	as a N	Memb	per of an Interprofessional Team
1	2	3	4	5	Task
					Identify team members' roles and responsibilities and seek help from other members of the team to optimize health care delivery.
					Include team members, listen attentively, and adjust communication content and style to align with team-member needs.
					Establish and maintain a climate of mutual respect, dignity, integrity, and trust; prioritize team needs over personal needs to optimize delivery of care; and help team members in need.
	-				equiring Urgent or Emergent Care and Initiate Evaluation and evel 3 required)
1	2	3	4	5	Task
					Recognize normal and abnormal vital signs as they relate to patient- and disease-specific factors as potential etiologies of a patient's decompensation.
					Recognize severity of a patient's illness and indications for escalating care.
					*Initiate and participate in a code response and apply basic and advanced life support.
		\leq			Upon recognition of a patient's deterioration, communicates situation to attending physician.
11. (Obtai	n Info	rmed	Con	sent for Tests and/or Procedures
1	2	3	4	5	Task
					Describe the key elements of informed consent: indications, contraindications, risks, benefits, alternatives, and potential complications of the intervention.
					Communicate with the patient and family to ensure that they understand the intervention including pre/post procedure activities.

1	2	3	4	5	Task
					*Demonstrate technical skills required for the procedure.
					Understand and explain the anatomy, physiology, indications, contraindications, risks, benefits, alternatives, and potential complications of the procedure.
					Completes expected procedures and keeps log book signed by mentor
	ldenti (*only				es and Contribute to a Culture of Safety and Improvement)
1	2	3	4	5	Task
					Identify and report actual and potential ("near miss") errors in care usin system reporting structure (event reporting systems, chain of command policies).
					Participate in system improvement activities in the context of learning experiences (rapid- cycle change using plan–do–study– act cycles, root cause analyses, morbidity and mortality conference, failure modes and effects analyses, improvement projects).
					Engage in daily safety habits (accurate and complete documentation, including allergies and adverse reactions, medicine reconciliation, patient education, universal precautions, hand washing, isolation protocols, falls and other risk assessments, standard prophylaxis, time outs).
					Admit one's own errors, reflect on one's contribution, and develop an individual improvement plan.
